Dear Hiring Manager,

Re: Risk & Controls / Operational Risk / Risk Assurance opportunities

I am writing to express my interest in opportunities across risk management, internal controls and risk assurance. I bring 4 years and 8 months of combined professional experience in enterprise risk and internal control, financial-services audit and financial analysis, supported by a Master of Science in Finance from HSE University.

At Rostelecom (Data Centres), I built an enterprise-wide risk and internal control framework covering approximately 90 risks and 250 controls and delivered more than 10 end-to-end risk-based business process reviews. I worked with process owners and senior leaders to assess control design and effectiveness, report findings and track corrective actions. My reviews identified revenue assurance issues, including unapproved discounts and free rack reservations, as well as electricity charges above contractual terms.

Previously, at EY Russia, I worked on IFRS audits in financial services. My responsibilities included sample-based IFRS 9 expected credit loss testing, recalculation of regulatory capital and risk-weighted assets, control walkthroughs and the escalation of material reporting discrepancies. I also use Excel, Power Query, Power BI, SQL and Python to investigate issues and communicate findings clearly.

I am now based in Melbourne and would welcome the opportunity to contribute this combination of risk, audit and analytical experience to an Australian organisation. I am available to commence from 28 December 2026 and would be pleased to discuss how my experience aligns with your team’s needs.

Thank you for your time and consideration.

Kind regards,
Aleksandr Korshunov
